

Zhuang languages

The **Zhuang languages** (autonym: *Vahcuengh*, pre-1982: *Vabcuɛŋb*, Sawndip: 𑜋𑜰𑜫, from *vah*, 'language' and *Cuengh*, 'Zhuang'; simplified Chinese: 壮语; traditional Chinese: 壯語; pinyin: *Zhuàngǔyǔ*) are any of more than a dozen Tai languages spoken by the Zhuang people of Southern China in the province of Guangxi and adjacent parts of Yunnan and Guangdong. The Zhuang languages do not form a monophyletic linguistic unit, as northern and southern Zhuang languages are more closely related to other Tai languages than to each other. Northern Zhuang languages form a dialect continuum with Northern Tai varieties across the provincial border in Guizhou, which are designated as Bouyei, whereas Southern Zhuang languages form another dialect continuum with Central Tai varieties such as Nung, Tay and Caolan in Vietnam.^[3] Standard Zhuang is based on the Northern Zhuang dialect of Wuming.

The Tai languages are believed to have been originally spoken in what is now southern China, with speakers of the Southwestern Tai languages (which include Thai, Lao and Shan) having emigrated in the face of Chinese expansion. Noting that both the Zhuang and Thai peoples have the same exonym for the Vietnamese, *𣊎𣊎𣊎*^{A1},^[4] from the Chinese commandery of Jiaozhi in northern Vietnam, Jerold A. Edmondson posited that the split between Zhuang and the Southwestern Tai languages happened no earlier than the founding of Jiaozhi in 112 BC. He also argues that the departure of the Thai from southern China must predate the 5th century AD, when the Tai who remained in China began to take family names.^[5]

Sites surveyed in Zhang (1999), subgrouped according to Pittayaporn (2009): ○ N, ○ M, ○ I, ○ C, ○ B, ○ F, ○ H, ○ L, ○ P

Zhāng Jūnrú's (张均如) *Zhuàngyǔ Fāngyán Yánjiù* (壮语方言研究 [A Study of Zhuang dialects]) is the most detailed study of Zhuang dialectology published to date. It reports survey work carried out in the 1950s, and includes a 1465-word list covering 36 varieties of Zhuang. For the list of the 36 Zhuang variants below from Zhang (1999), the name of the region (usually county) is given first, followed by the specific village. The phylogenetic position of each variant follows that of Pittayaporn (2009)^[6] (see [Tai languages#Pittayaporn \(2009\)](#)).

Varieties

The Zhuang language (or language group) has been divided by Chinese linguists into northern and southern "dialects" (fangyan 方言 in Chinese), each of which has been divided into a number of vernacular varieties (known as *tǔyǔ* 土语 in Chinese) by Chinese linguists (Zhang & Wei 1997; Zhang 1999:29-30).^[7] The Wuming dialect of Yongbei Zhuang, classified within the "Northern Zhuang dialect," is considered to be the "standard" or prestige dialect of Zhuang, developed by the government for certain official usages. Although Southern Zhuang varieties have aspirated stops, Northern Zhuang varieties lack them.^[8] There are over 60 distinct tonal systems with 5–11 tones depending on the variety.

Zhang (1999) identified 13 Zhuang varieties. Later research by the Summer Institute of Linguistics has indicated that some of these are themselves multiple languages that are not mutually intelligible without previous exposure on the part of speakers, resulting in 16 separate ISO 639-3 codes.^{[9][10]}

Northern Zhuang

Northern Zhuang comprises dialects north of the Yong River, with 8,572,200 speakers^{[7][11]} (ISO 639 *ccx* (<https://www.ethnologue.com/language/ccx>) prior to 2007):

- **Guibei** 桂北 (1,290,000 speakers): Luocheng, Huanjiang, Rongshui, Rong'an, Sanjiang, Yongfu, Longsheng, Hechi, Nandan, Tian'e, Donglan (ISO 639 *zgb* (<https://www.ethnologue.com/language/zgb>))
- **Liujiang** 柳江 (1,297,000 speakers): Liujiang, Laibin North, Yishan, Liucheng, Xincheng (ISO 639 *zlj* (<https://www.ethnologue.com/language/zlj>))
- **Hongshui He** 红水河 (2,823,000 speakers): Laibin South, Du'an, Mashan, Shilong, Guixian, Luzhai, Lipu, Yangshuo. Castro and Hansen (2010) distinguished three mutually unintelligible varieties: Central Hongshuihe (ISO 639 *zch* (<https://www.ethnologue.com/language/zch>)), Eastern Hongshuihe (ISO 639 *zeh* (<https://www.ethnologue.com/language/zeh>)) and Liujian (ISO 639 *zjq* (<https://www.ethnologue.com/language/zjq>)).^[12]
- **Yongbei** 邕北 (1,448,000 speakers): Yongning North, Wuming (prestige dialect), Binyang, Hengxian, Pingguo (ISO 639 *zyb* (<https://www.ethnologue.com/language/zyb>))
- **Youjiang** 右江 (732,000 speakers): Tiandong, Tianyang, and parts of the Baise City area; all along the Youjiang River basin area (ISO 639 *zyj* (<https://www.ethnologue.com/language/zyj>))
- **Guibian** 桂边 (Yei; 827,000 speakers): Fengshan, Lingyun, Tianlin, Longlin, Yunnan Guangnan North (ISO 639 *zgn* (<https://www.ethnologue.com/language/zgn>))
- **Qiubei** 丘北 (Yei; 122,000 speakers): Yunnan Qiubei area (ISO 639 *zqe* (<https://www.ethnologue.com/language/zqe>))
- **Lianshan** 连山 (33,200 speakers): Guangdong Lianshan, Huaiji North (ISO 639 *zln* (<https://www.ethnologue.com/language/zln>))

Southern Zhuang

Southern Zhuang dialects are spoken south of the Yong River, with 4,232,000 speakers^{[7][11]} (ISO 639 *ccy* (<https://www.ethnologue.com/language/ccy>) prior to 2007):

- **Yongnan** 邕南 (1,466,000 speakers): Yongning South, Fusui Central and North, Long'an, Jinzhou, Shangse, Chongzuo areas (ISO 639 *zyn* (<https://www.ethnologue.com/language/zyn>))
- **Zuojiang** 左江 (1,384,000 speakers): Longzhou (Longjin), Daxin, Tiandeng, Ningming; Zuojiang River basin area (ISO 639 *zzj* (<https://www.ethnologue.com/language/zzj>))
- **Dejing** 得靖 (979,000 speakers): Jingxi, Debao, Mubian, Napo. Jackson, Jackson and Lau (2012) distinguished two mutually unintelligible varieties: Yang (ISO 639 *zyg* (<https://www.ethnologue.com/language/zyg>)) and Min (ISO 639 *zgm* (<https://www.ethnologue.com/language/zgm>))^[13]
- **Yanguang** 砚广 (Nong; 308,000 speakers): Yunnan Guangnan South, Yanshan area (ISO 639 *zhn* (<https://www.ethnologue.com/language/zhn>))
- **Wenma** 文麻 (Dai; 95,000 speakers): Yunnan Wenshan, Malipo, Guibian (ISO 639 *zhd* (<https://www.ethnologue.com/language/zhd>))

Tày-Nùng language is also considered one of the varieties of Central Tai and shares a high mutual intelligibility with Wenshan Dai and other Southern Zhuang dialects in Guangxi.

Recently described varieties

Johnson (2011) distinguishes four distinct Zhuang languages in Wenshan Prefecture, Yunnan: Nong Zhuang, Yei Zhuang, Dai Zhuang, and Min Zhuang.^[14] Min Zhuang is a recently discovered variety that has never been described previous to Johnson (2011). (See also *Wenshan Zhuang and Miao Autonomous Prefecture#Ethnic groups*)

Pyang Zhuang and Myang Zhuang are recently described Central Tai languages spoken in Debao County, Guangxi, China.^{[15][16]}

Writing systems

The Zhuang languages have been written in the ancient Zhuang script, *Sawndip*, for over a thousand years, and possibly *Sawgoek* previous to that. *Sawndip* is a Chinese character-based system of writing, similar to Vietnamese *chữ nôm*; some *sawndip* logograms were borrowed directly from Han characters, whereas others were original characters created from the components of Chinese characters. It is used for writing songs about every aspect of life, including in more recent times encouraging people to follow official family planning policy.

There has also been the occasional use of a number of other scripts including pictographics *proto-writing*, such as in the example at right.

Zhuang Sawndip manuscript

In 1957 Standard Zhuang using a mixed Latin-Cyrillic script was introduced, and in 1982 this was changed to Latin script; these are referred to as the old Zhuang and new Zhuang, respectively. Bouyei is written in Latin script.
